SUMMARY

Junior Frontend Developer with hands-on experience building production-style web and mobile applications using React, Next.js, and modern frontend ecosystems. Skilled in component-based architecture, REST API integration, and scalable UI development using Tailwind CSS, shadcn/ui, and Radix UI. Strong background in structured execution and ownership developed through previous leadership roles and practical software engineering projects.

TECHNICAL SKILLS

- **Frontend:** Frontend: React, Next.js (App Router), JavaScript (ES6+), TypeScript (basic)
- **UI / Styling:** UI / Styling: Tailwind CSS, shadcn/ui, Radix UI, Framer Motion, Responsive Design
- **State Management & Forms:** State Management & Forms: Zustand, React Hook Form, Zod
- **Backend (Basic):** Backend (Basic): Node.js, MongoDB, Mongoose, Firebase (Firestore), Appwrite
- **APIs & Services:** APIs & Services: REST API, Stripe, Clerk Authentication
- **Maps & Geo:** Maps & Geo: Leaflet, React-Leaflet, TomTom Web SDK
- **Tools:** Tools: Git, GitHub, Vite, ESLint, Prettier, Cypress (basic), Vitest (basic)

PROJECT EXPERIENCE

Frontend / Fullstack Developer (Self-Directed Projects)

2022 – Present

- Built and deployed 4+ production-style applications using React, Next.js, and modern frontend stacks.
- Designed scalable component-based architecture using reusable UI systems (shadcn/ui, Radix UI patterns).
- Developed full-featured applications with authentication, CRUD operations, and dynamic routing.
- Integrated backend services and databases including Firebase, MongoDB, and Appwrite.
- Implemented REST API integrations and structured client-side data flow.
- Built responsive, mobile-first UI systems ensuring cross-device compatibility.
- Implemented advanced features including maps (Leaflet + TomTom), payments (Stripe), and form validation (Zod)..

Real Estate Platform

Tech Stack: React, Firebase, Leaflet, TomTom, Tailwind CSS

- Built a property listing application with Firebase Firestore backend integration.
- Implemented interactive geolocation maps using Leaflet and TomTom APIs.
- Developed reusable UI components following modern shadcn/ui design patterns.
- Added image galleries and media browsing using Swiper.
- Designed fully responsive UI optimized for mobile and desktop..

 **Source Code on GitHub** (<https://github.com/Iryna-Vyshniak/RealEstate>)

LittleLingo – Mobile Learning App

Tech Stack: Ionic, React, Capacitor

- Developed cross-platform mobile application (iOS / Android).
- Implemented drag-and-drop interactions using React DnD.
- Managed application state using Zustand.
- Built animations and UI transitions using Framer Motion.
- Structured scalable component architecture for learning flows..

 **Source Code on GitHub** (<https://github.com/Iryna-Vyshniak/LittleLingo>)

Events Platform

Tech Stack: Next.js 14, MongoDB, Stripe

- Built fullstack event management platform using Next.js App Router.
- Integrated MongoDB + Mongoose for database modeling.
- Implemented authentication using Clerk.
- Added payment processing using Stripe API.
- Built UI using shadcn/ui and Radix UI components..

 **Source Code on GitHub** (https://github.com/Iryna-Vyshniak/next14_mern_events_platform)

HealthyCare – Patient Management System

Tech Stack: Next.js, Appwrite

- Developed healthcare workflow system (appointments, patient records).
- Integrated Appwrite backend services and authentication.
- Built structured forms using React Hook Form + Zod.
- Designed responsive UI using Tailwind CSS and shadcn/ui..

 **Source Code on GitHub** (<https://github.com/Iryna-Vyshniak/healthy-care>)

PROFESSIONAL EXPERIENCE

Freelance Work, Part-time Roles & Volunteer Activities

2022 – Present

Structured transition period combining self-directed software development with diverse work and volunteering experience. Performed part-time roles (tutoring, service-based work), strengthening responsibility, communication, and adaptability. Engaged in animal rescue volunteering, supporting care, coordination, and assistance activities. Maintained continuous self-learning in frontend development (React, Next.js, modern JS ecosystem). Transitioned into software engineering through hands-on project development and real implementations.

- Performed part-time roles (tutoring, service-based work), strengthening responsibility, communication, and adaptability.
- Engaged in animal rescue volunteering, supporting care, coordination, and assistance activities.
- Maintained continuous self-learning in frontend development (React, Next.js, modern JS ecosystem).
- Transitioned into software engineering through hands-on project development and real implementations..

Chief Manager — VIP Residential Complex

Kyiv Region | 2016 – 2022

- Managed operational workflows in a high-responsibility environment.
- Coordinated internal processes and service operations.
- Ensured system stability and issue resolution.
- Improved operational efficiency and daily execution processes..

School Principal — Secondary School

Luhansk Region | 2014 – 2016

- Led full institutional operations and staff coordination.
- Structured administrative workflows and planning systems.
- Improved organizational efficiency and execution processes.
- Managed institutional development and operational stability..

EDUCATION

Master's Degree — Literature & English Language

Taras Shevchenko Luhansk National University | 1998 – 2005

LANGUAGES

- **Ukrainian:** Native
- **Russian:** Native
- **English:** Pre-Intermediate A2+ (Technical reading, documentation, basic communication)

KEY STRENGTHS

- Production-style frontend development mindset.
- Strong component architecture and UI system thinking.
- Fast self-learning through real project execution.
- High ownership and structured problem-solving.
- Ability to bridge frontend and fullstack workflows.
